-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2614

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 6 and 11 are now rejected under 35 U.S.C. 102(b) as being anticipated by Tseung.

The comprehensive communication system of Tseung (noting particularly Figs. 1 and 2 and alternate embodiments in Figs. 72-81) enables broadcasting in point-to-multipoint or multipoint-to-multipoint arrangements (e.g. Abstract) of any of various data, and lists 15 different examples of data types, further allowing for any kind beyond those listed (col. 8 line 64 – col. 9 line 14). A receiving station (i.e. general participant station) 24 can receive, store and/or record a desired broadcast data, which data is inherently identified by a code (in order to inform both the transmitting and receiving stations its unique identity), as well as typically being designated by a title or other identifier. The data request is sent to retransmission station 20, and if the broadcast content received (stored, recorded) at station 24 from station 20 is erroneous, a substituted correct broadcast content is requested (i.e. what one of ordinary skill in the art can consider searched, scanned, sought or otherwise looked for) from an auxiliary station, namely playback recorder station 26 (which serves as the claimed rerecord promote means), which accesses correct broadcast content from station 28. Station 26 thereby carries out the request, which effectively constitutes a reservation request for reception at a presumed time at station 24, for accurate reception/storage/recording, thereby meeting claims 1 and 11.

Art Unit: 2614

As for claim 3, station 26 (rerecord promote means) inherently informs user station 24 of the alternate broadcast (at least by submitting the correct broadcast content thereto).

As for claim 6, the user station 24 does become aware of broadcast failure (e.g. text in lower third of the Abstract).

3. Claims 4, 5, 7-10, 12 and 13 appear allowable over the prior art.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is 703 305-4374. The examiner can normally be reached on Monday - Friday from 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on 703 305-4795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
